

Introducing the Next Generation of Ozone Sparge Systems from H₂O Engineering

Effective for full scale site cleanups, our ozone sparge units are completely integrated as stand alone self-contained systems. Built-in oxygen purity sensor maintains system up-time and provides diagnostics to prevent system failure.

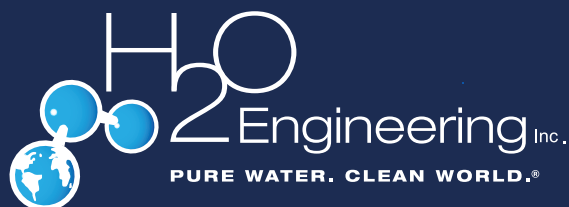

- Cabinet, trailer, skid, and container mounted units
- Rental fleet from 2.7 lb/day to 27.4 lb/day
- Ozone systems starting at 2.7 lb/day
- Startup and technical support available

FEATURING

Intel-Zone® Controls with Remote Telemetry

View performance data and control the machine from any device.
