

The Sure-Weld Felt Filter Bag, with our proprietary "Tri-Seal" P-flange provides a distinct advantage compared to conventional sewn filter bag with metal snap rings or industry standard poly flanges. Using state-of-the-art welding technology specifically designed to bond needle punched textile fabrics, we are able to offer the strongest most reliable welded filter bags on the market.

Our Sure-Weld filters come with the security of an overlap side seam, which eliminates the "bump" that occurs with conventional sewn snap ring filters. By welding to a "Tri-Seal" P-flange our fully welded filter bags offer unparalelled seal security, which delivers superior filtrate consistancy.

Features & Benefits

Sure-Weld

- Higher efficiencies due to tighter seal tolerances
- · No thread, which eliminates potential silicone contamination from this likely source
- Puncture free overlap side seams provide added strength and improves effluent consistency

Specifications

Polypropylene - Chemical Compatibility*

*Please consult with your Application Engineer to verify specific chemical compatibility

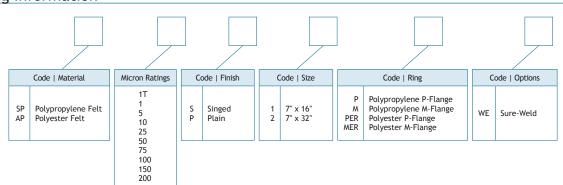

Temperature	Chemical	Compatibility
200°F	Acids	Excellent
200°F	Alkali	Excellent
200°F	Oxidizing Agents	Excellent
200°F	Solvents	Average

Polyester - Chemical Compatibility*

*Please consult with your Application Engineer to verify specific chemical compatibility

Temperature	Chemical	Compatibility
300°F	Weak Acids	Good
300°F	Strong Acids	Good
300°F	Weak Alkali	Poor
300°F	Strong Alkali	Poor
300°F	Solvents	Very Good
300°F	Petroleum Products	Very Good
